

Pothole scouting specs

- measures very roughly 18" x 24" - the art is done to this size - frequently it's cut down to fit pothole
- at least 1" deep
- can't be in center of road (unless road is very wide) - ideally off to side - can't block traffic during install
- asphalt around it needs to be stable
- street can't be too beat up or look ready to be repaved soon
- needs to be in location easily seen by the public
- you get a snazzy POTHOLE patch if i use your suggestion!
